AIRSTAGE™

VRF

Light Commercial &
Commercial,
Residential

FUJITSU GENERAL (Euro) GmbH participates in the ECP programme for VARIABLE REFRIGERANT FLOW SYSTEMS. Check ongoing validity of certificate: www.eurovent-certification.com * Models so marked are not ECC certified.

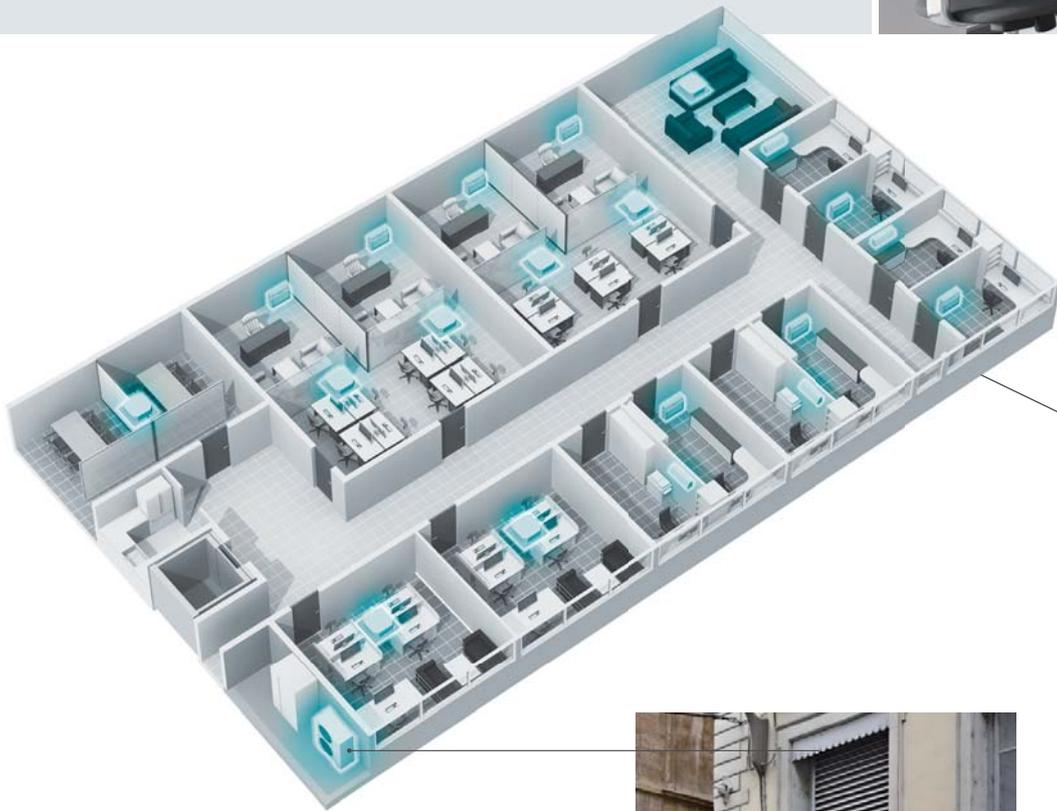

FUJITSU GENERAL LIMITED

Small Offices

For Light Commercial

Fujitsu General provides perfect ideal air conditioning systems that take into account energy saving, low noise, comfortable airflow, small room application and centralised control for small-sized office buildings with many small rooms.

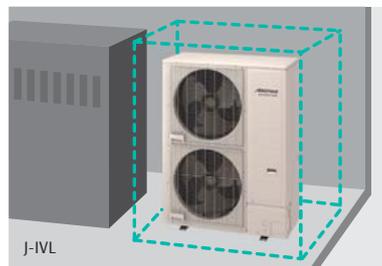

NEW

AIRSTAGE™ J Series Up to 18 HP with a compact outdoor unit

This small VRF system is suitable for a building with many small rooms. Max. 42* indoor units can be connected.

*Only J-IVL 18 HP model

Compact and low noise outdoor unit

This compact outdoor unit does not take up much space even if installed in a machine room or on the rooftop. This unit provides enough static pressure even if there are louvres. Low noise operation is possible at nighttime by a low noise mode.

Central Remote Controller UTY-DCGYZ1

Centralised remote controller with improved operability

Each individual room can have its own schedule setting. This controller makes energy saving management possible with upper/lower temperature limit settings and operation prohibited settings.

Various indoor units lineup for low capacity class

Various range of low capacity 1.1 kW indoor units to suit small rooms or spaces.

LAN

PC

Control and monitoring

The same level of management that is possible from the centralised controller is possible even if you are at your desk. Non-administrators can also operate the air conditioners with a PC, Smartphone or tablet.

Wireless LAN

Fixed IP, IP forwarding and open Port required

Router

Tablet PC

Smartphone

*Wireless LAN support : Future release

NEW

New Compact wired remote controller

A compact controller with a large screen making operation easy. A stylish design to suit any interior..

Large Building

For Commercial

Fujitsu General provides modular type VRF systems that seek high efficiency, comfort, design freedom, easy installation and reliability for large commercial buildings.

Abundant lineup suitable to match the operating environment

VRF Series lineup to meet various needs such as energy saving-orientated models.

NEW

AIRSTAGE™ VR-IV

Cutting-edge design. Extensive lineup from 8 HP to 48 HP in 2 HP increment. Connectable indoor unit capacity ratio up to 150%

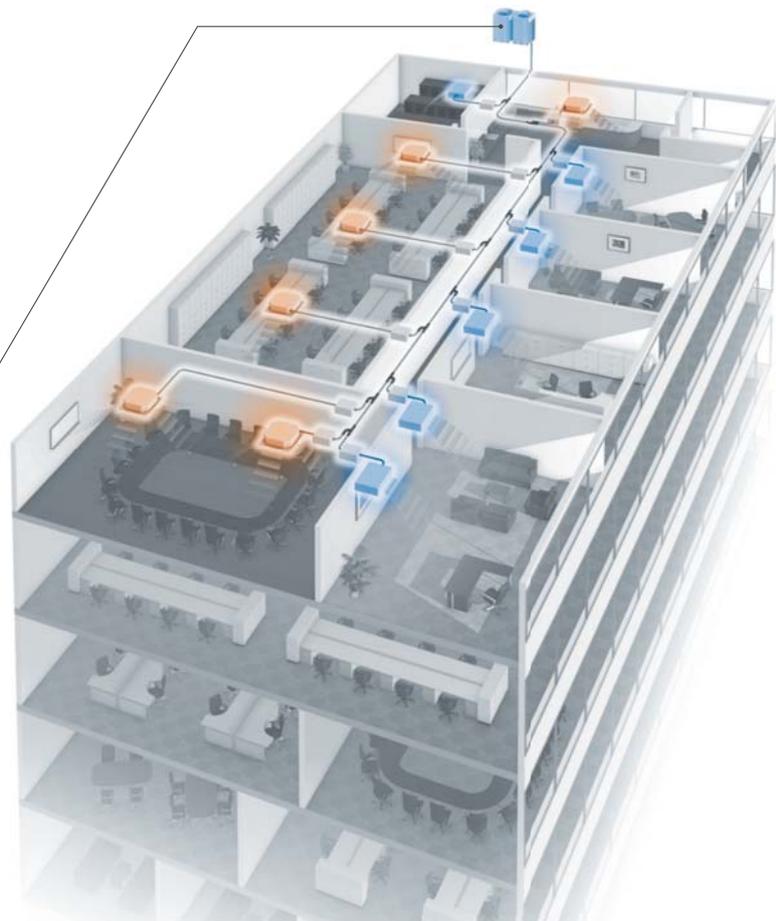

8 HP - 48 HP 34 Models

- Space saving combination: 8 HP to 48 HP/21 models
- Energy efficiency combination: 16 HP to 44 HP/13 models

AIRSTAGE™ V-III

8 HP - 54 HP 39 Models

- Space saving combination: 8 HP to 54 HP/24 models
- Energy efficiency combination: 16 HP to 46 HP/ 15 models

Individual air conditioning system for large buildings

AIRSTAGE VR IV outdoor units provide simultaneous heating and cooling up to 48HP.

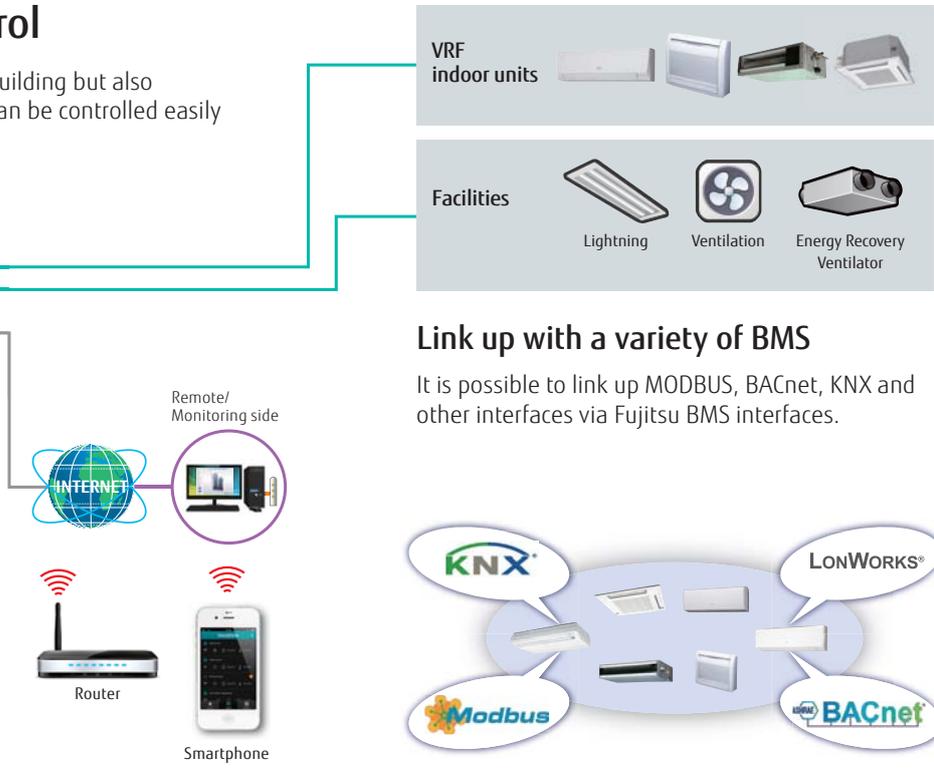

Centralised control

Not only indoor units in the building but also facilities such as ventilation can be controlled easily by anyone.

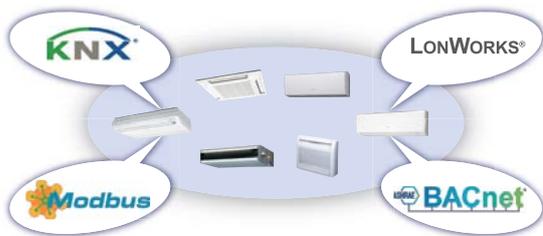

System Controller
(UTY-APGXZ1)
System Controller Lite
(UTY-ALGXZ1 & UTY-PLGXX2)

Link up with a variety of BMS

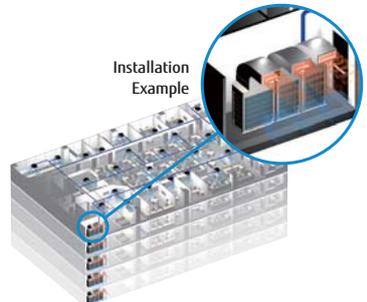

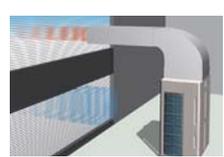

It is possible to link up MODBUS, BACnet, KNX and other interfaces via Fujitsu BMS interfaces.

High system flexibility

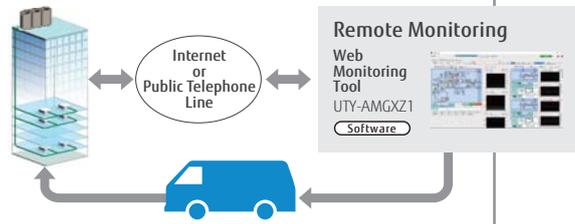

Flexible installation on each floor and installation of a variety of indoor unit styles. Outdoor units provides high static pressure, long piping design and connection capacity.

82* Pa
*: V-III, 80Pa for VR-IV

Rapid service support

The air conditioning of the entire building can be monitored remotely with Web Monitoring Tool and System Controller.

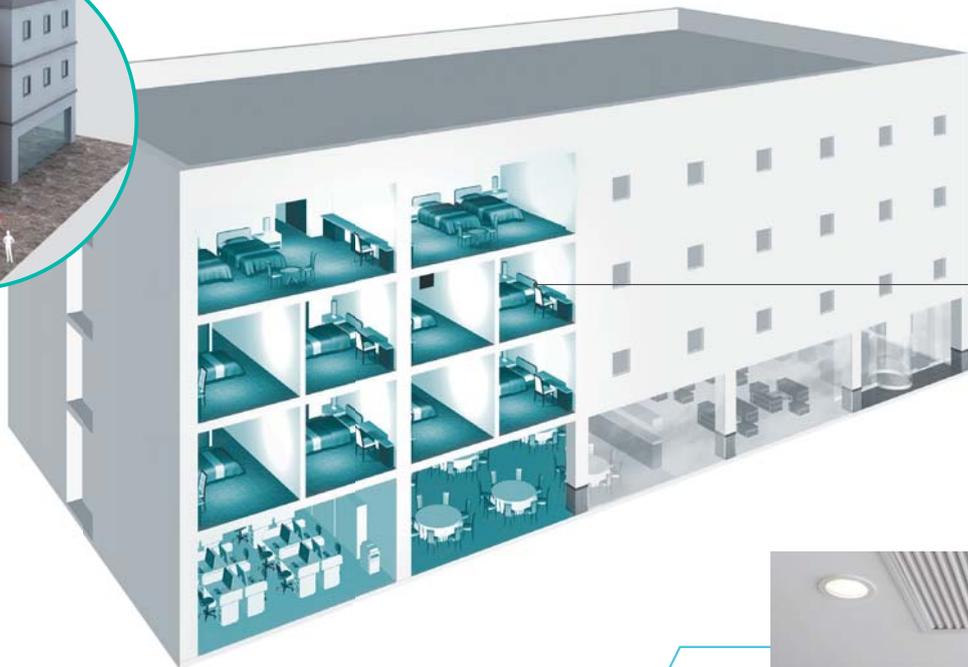

Hotels

For Light Commercial

Fujitsu General provides total air conditioning systems that take into account comfort, energy saving, external appearance, safety and easy installation for small hotels.

J-IV

J-IVL

J-IVL
High capacity model

NEW

AIRSTAGE™ J Series appearance-oriented compact outdoor unit

Due to the lowest and most compact design in the industry, the outdoor units can be positioned to minimize the impact on the buildings appearance.

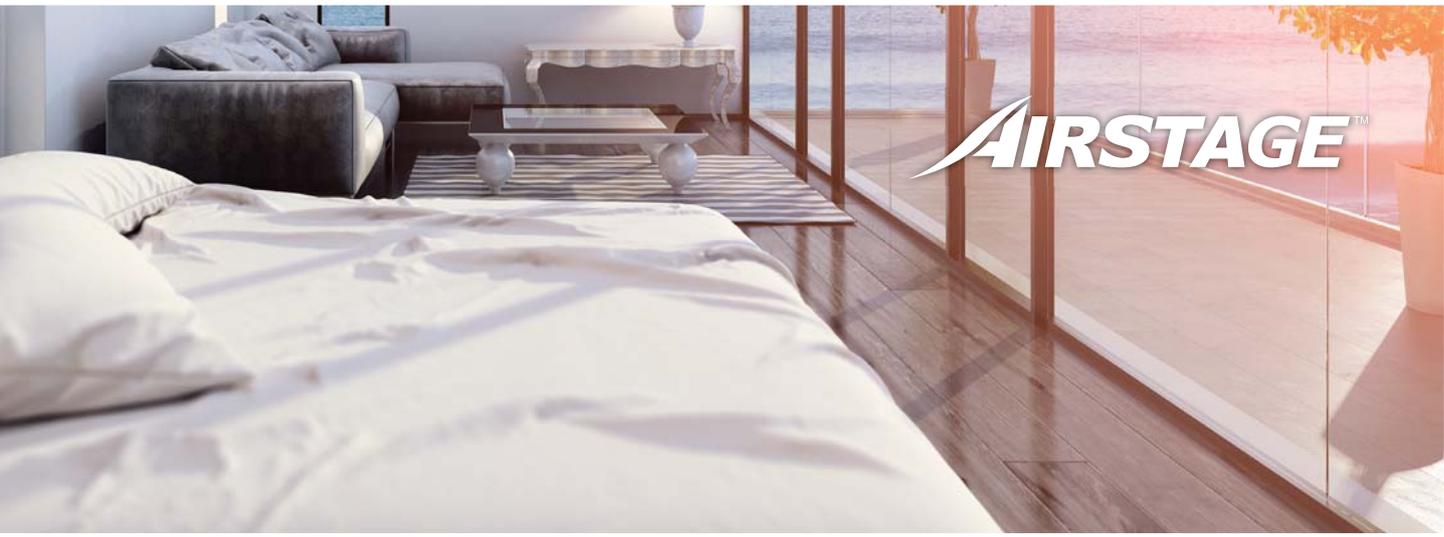

Ventilation of the whole hotel supported

Outdoor air processing is essential in hotel spaces. The DX-Kit can link up with air handling units to ensure sufficient ventilation.

EEV unit

Control unit

Guest room air conditioning with excellent comfort, energy saving and easy installation

Space saving
Mini duct type with 198 mm height and 450 mm depth. This can be installed in narrow ceiling space easily.

Mini Duct

Card key switch available
Using the card key prevents you from forgetting to switch off the air conditioner.

Use of an external connect switch

Comfortable airflow from vertical louvre movement
The Auto Louvre Grille Kit achieves comfortable airflow by adjusting the air direction.

Auto Louvre Grille Kit

Centralised control of air conditioning in shared spaces

Air conditioning in shared spaces such as lobbies and hallways is controlled centrally. Temperature and operating conditions can be managed without the adjustment by guests.

System controller

Simple Remote Controller with sophisticated design

Suitable for hotels or offices as it is easily operated with no complex functions. Large LCD screen & simple operation buttons White coloured backlight on monitor enable easy operation in dark.

Large space air conditioning in the reception and lobby

Ultra-large duct type single split system suitable for large spaces with high ceilings

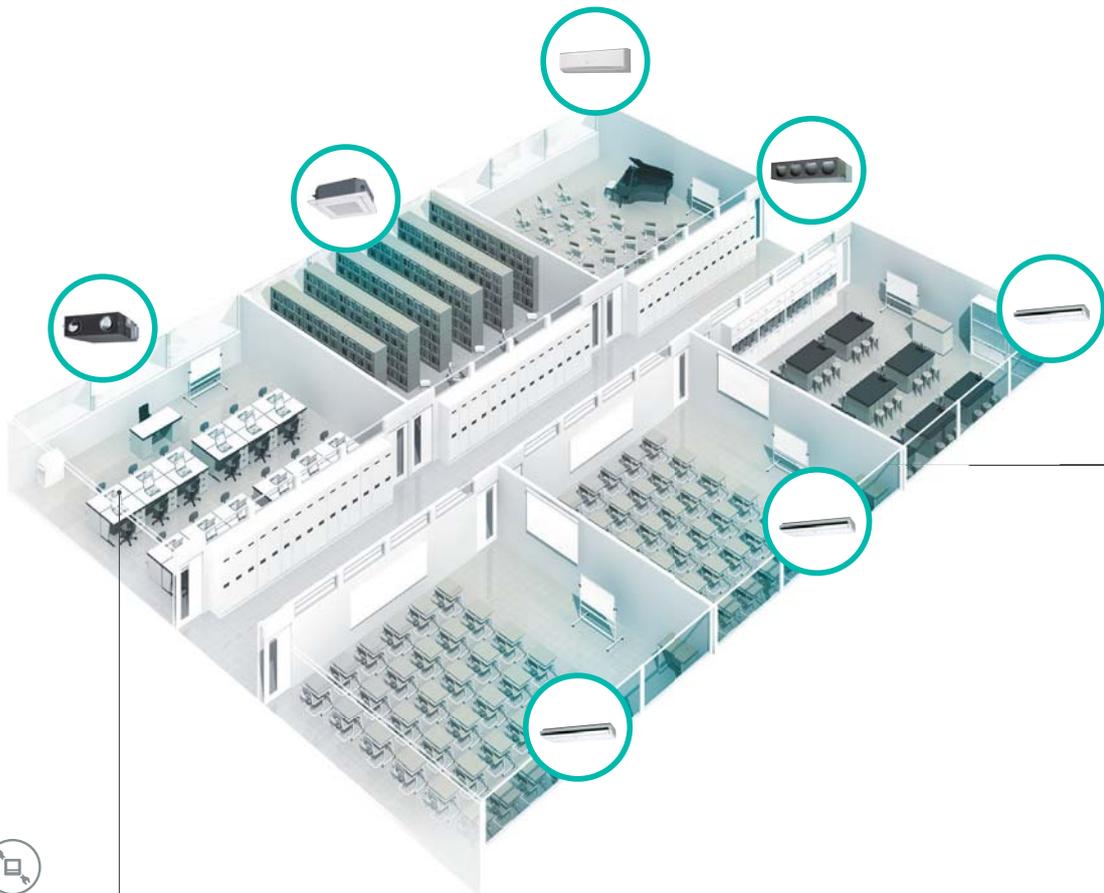

School

For Light Commercial

Fujitsu General provides the optimal number of connected indoor units for mid-sized educational institutions. The degree of freedom of the installation location is improved with a compact design that minimises the installation area.

Centralised control of both air conditioning and ventilation equipment

It is possible to perform centralised control including the operation of lighting and ventilation equipment in addition to air conditioners. This is useful in energy saving management over the whole building.

System Controller Lite

AIRSTAGE™

Mini Duct

Medium Static Pressure Duct

Ceiling

Wall Mounted

Various indoor units

We have a lineup of indoor units suitable for even the most complex applications – from normal classrooms to special classrooms and auditoriums. .

Energy Recovery Ventilator

Circular Flow Cassette

Comfortable room air conditioning to all areas of the room

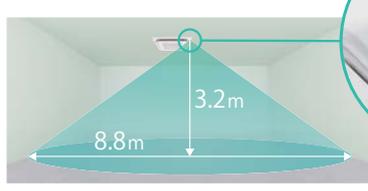

Circular Flow Cassette blows out in all directions without temperature unevenness

Individual airflow direction control to prevent people from being exposed to airflow

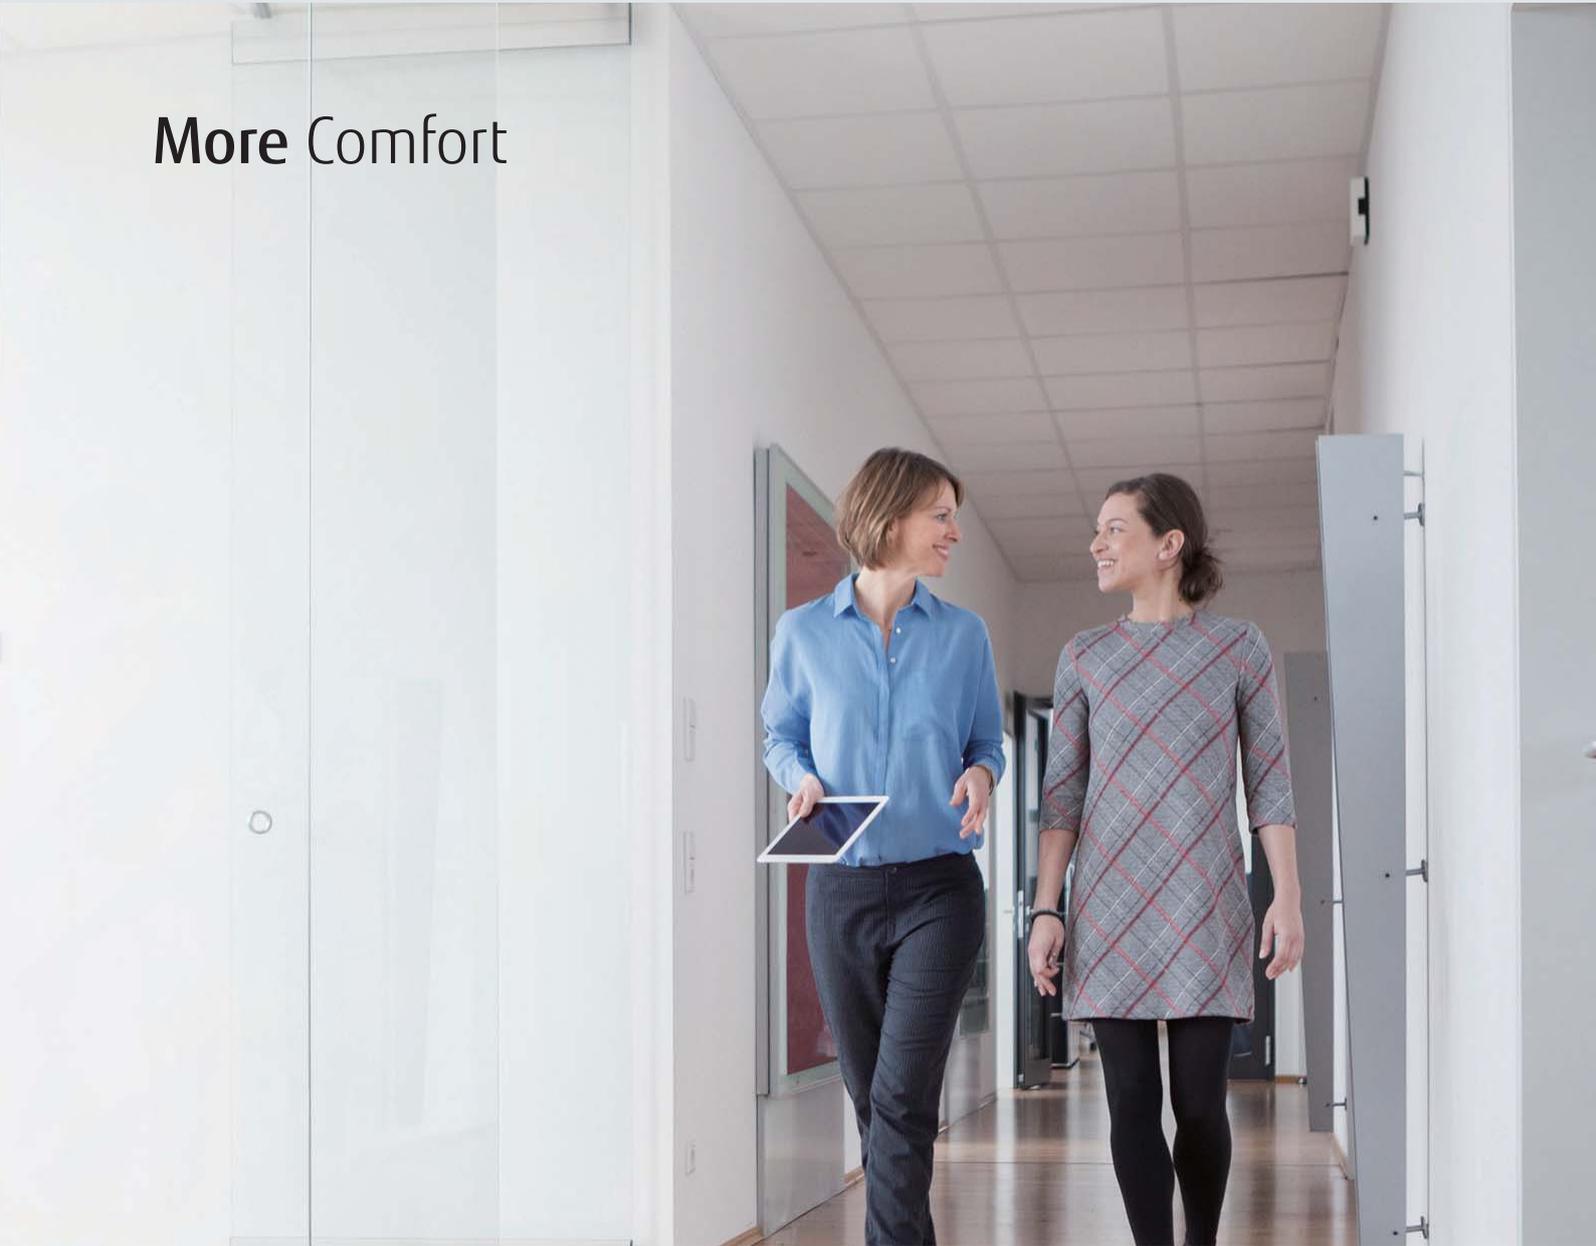

The optional human sensor reduces running costs by controlling the indoor unit based on the occupancy of the room.

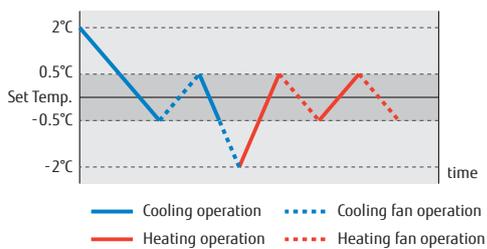

Human sensor (Option)

More Comfort

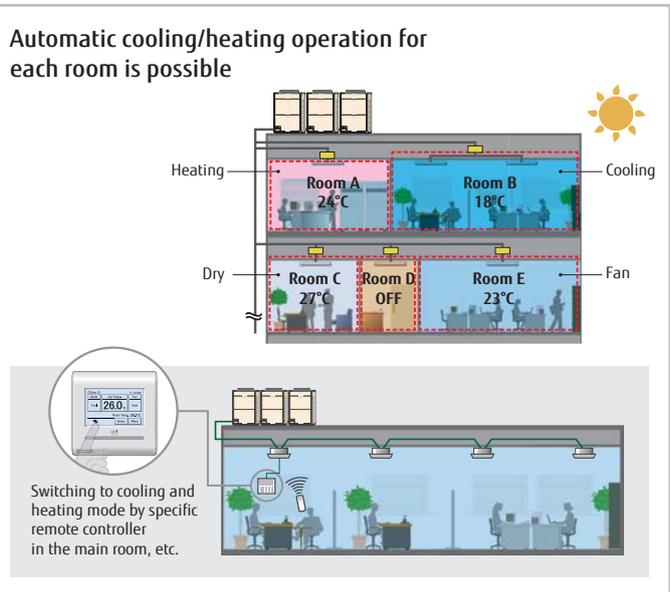

Auto changeover function

The cooling/heating mode is automatically switched according to the set temperature and room temperature.

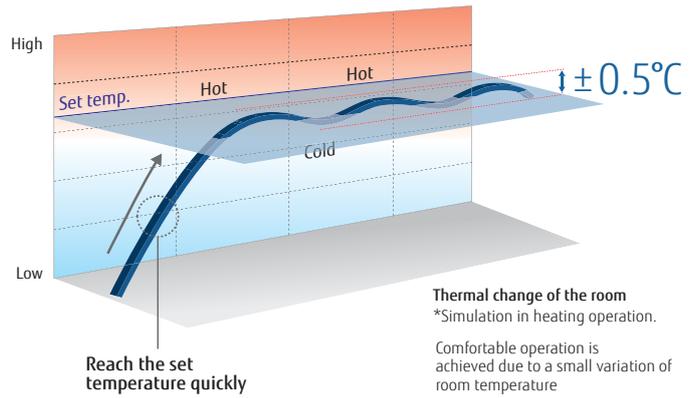

Auto changeover setting allows for the product to easily switch between cooling and heating modes regardless of the operation mode of other indoor units. This can be done via specific indoor unit with wired remote controller. This ensures comfortable operation all year round.

Precision refrigerant flow control

Precise and smooth refrigerant flow control is achieved by using a DC Inverter control in conjunction with individual indoor unit electronic expansion valve control. This allows high precision comfortable temperature control of $\pm 0.5^{\circ}\text{C}$.

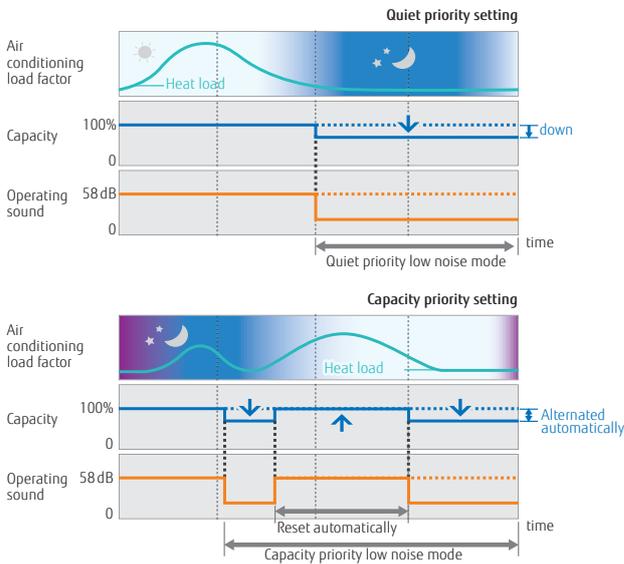

Quiet operation

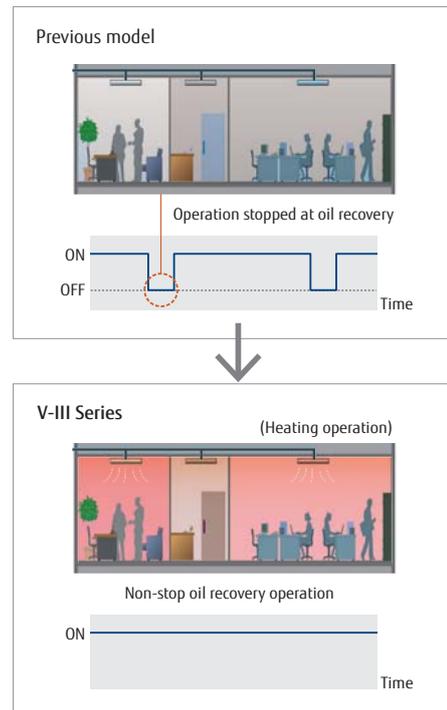

Quiet operation

Two low noise modes can be selected automatically by quiet priority setting and capacity priority setting depending on the indoor environment and outside temperature load. This feature can be controlled via outdoor unit external input and/or system controller.

Non-stop oil recovery operation

A comfortable room condition is maintained during oil recovery mode because the product continues to operate without stopping the cooling or heating operation.

Low sound level design

Small capacity indoor units respond to the demand of several applications.

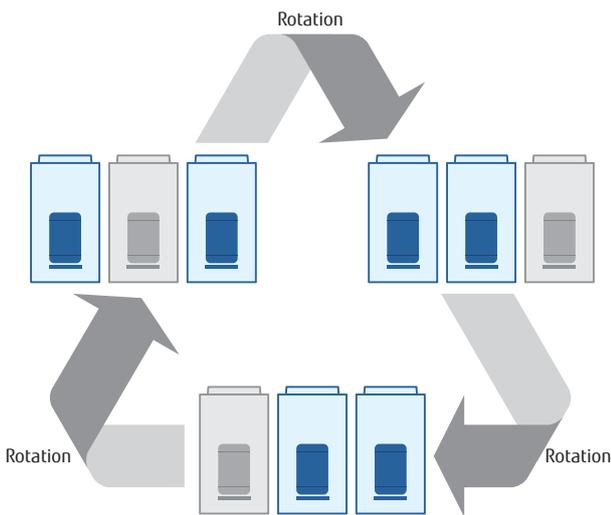

These models will be able to offer comfortable environment by operating at super low sound levels. Especially, Wall mounted (EEV external) type is 19dB(A) when low mode heating operation.

High Reliability

Outdoor unit rotational operation

The compressor starting order is rotated so that the running time is shared.

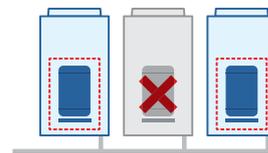

Note: Rotational operation is alternated by the start / stop timing of the compressor.

Backup operation

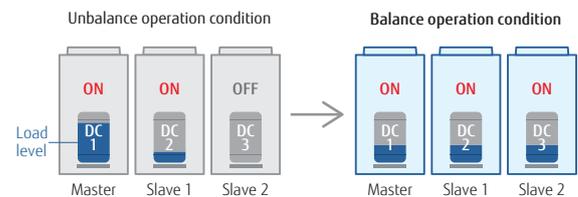

If one compressor fails, backup operation will be performed by the remaining compressors*.

*: Note: Backup operation may not be possible depending on the trouble state.

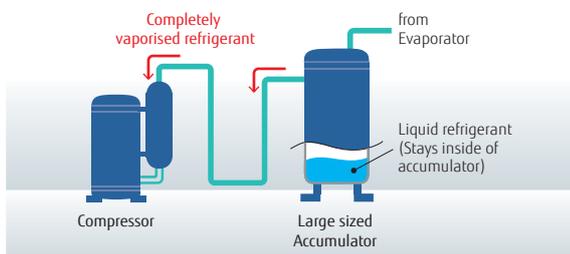

Advanced refrigerant control

Innovative compressor control logic has been introduced in order to balance the refrigerant mass flow rate of each outdoor unit by controlling the inverter speed.

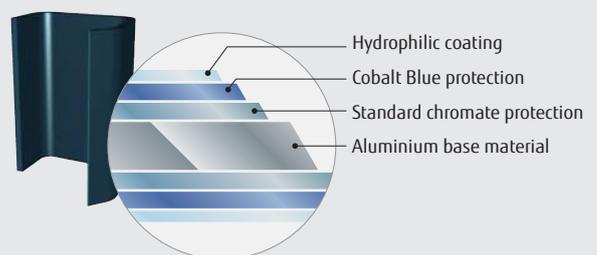

Liquid flow back protection

By adopting a large sized accumulator, any liquid refrigerant stays inside of the accumulator to ensure no liquid refrigerant is being fed into the compressor.

Adoption of blue fin heat exchanger

Corrosion resistance of the heat exchanger has been improved by the introduction of blue fin treatment to the outdoor unit's heat exchanger.

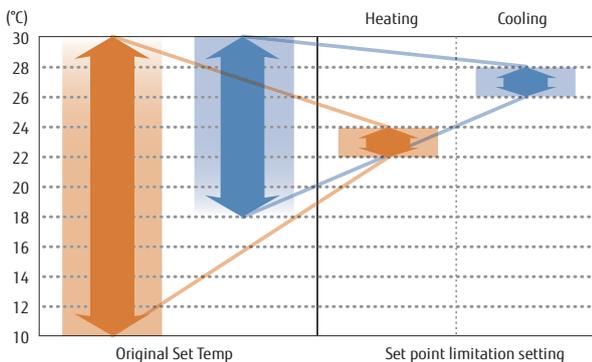

Operation Performance is Efficiently Controlled.

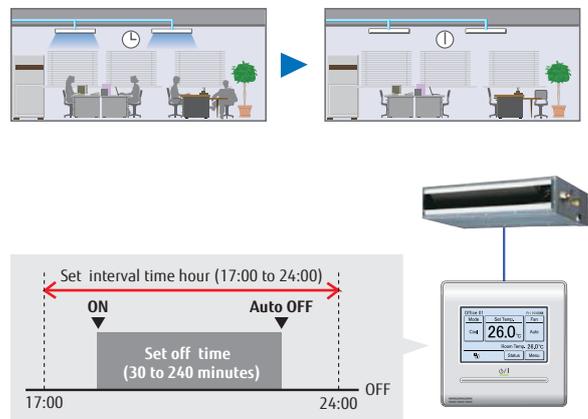

Room temperature set point limitation

The minimum and maximum temperature ranges can be limited, which provide energy saving while maintaining the comfort of the occupants.

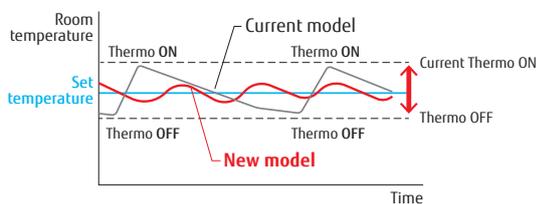

Auto-off timer

New wired remote controller is equipped with an OFF timer function that automatically stops operation when a fixed time has elapsed from the start of operation. This prevents wasted energy.

New intelligent refrigerant control

New refrigerant control can be operated with suitable control corresponding to heat load of the room and can offer a more comfortable space. New refrigerant control can also provide more energy savings.

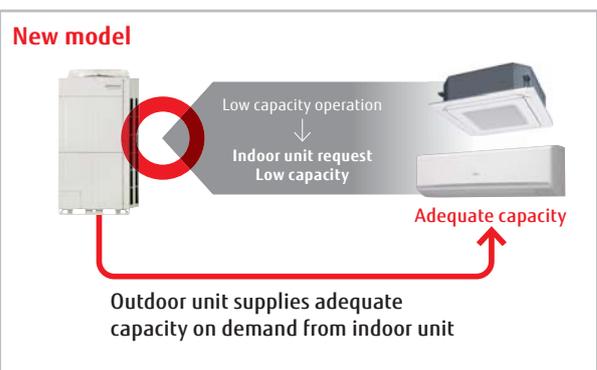

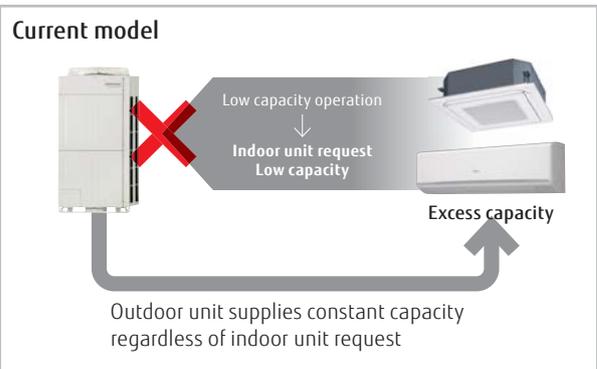

Current refrigerant control

Thermostat-ON/OFF occurs frequently.
→ The comfort is not good since room temperature often changes. Energy saving is not good since compressor is repeatedly starting and stopping frequently.

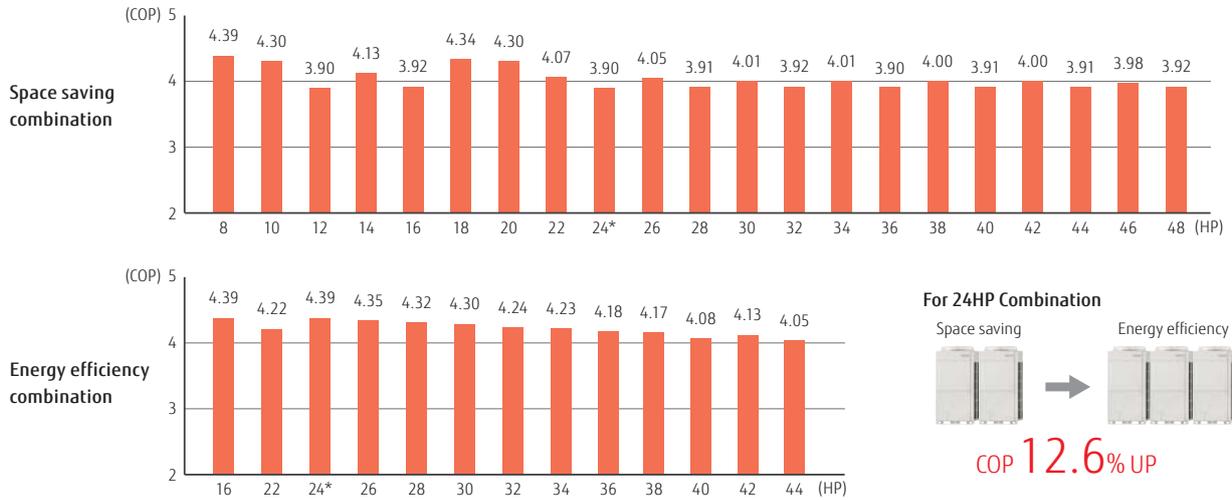

New refrigerant control

Room target temperature is maintained as thermostat-ON/OFF occurs less than Current control. Energy saving is also improved.

Efficiency in actual operation

Top class high COP(Max. Heating) is achieved for all combinations by our unique heat exchanger structure, and highly efficient DC twin compressor.

All inverter compressor

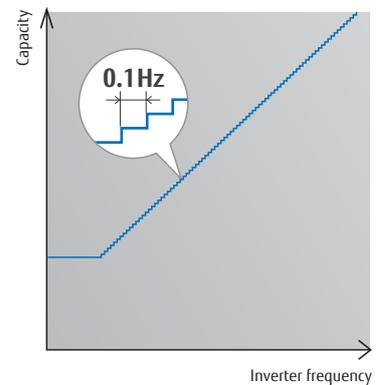

Large capacity DC inverter compressor

Large capacity highly efficient DC twin rotary compressor with excellent intermediate capability.

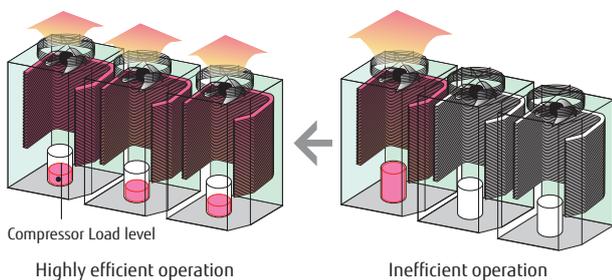

Highly efficient compressor speed control

Comfortable space with small room temperature changes energy efficiency is maximized by 0.1Hz steps compressor speed control.

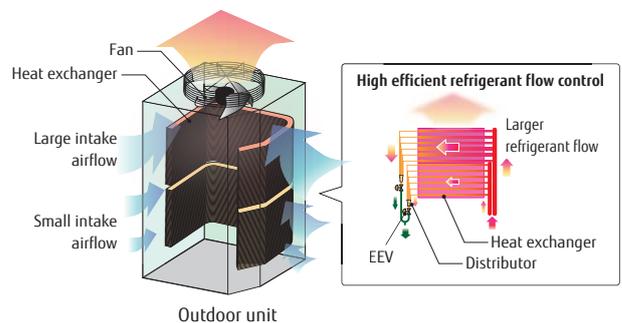

Multiple outdoor operation control

When multiple outdoor units are connected a sophisticated operation is performed by each compressor. Rather than running one compressor at full load and distributing refrigerant to one heat exchanger, this control method operates all compressors at part load and distributes refrigerant to all of the heat exchangers which allows for the overall system efficiency to be improved.

Heat exchanger refrigerant control

The heat exchanger in the outdoor unit is split into two parts (Top and Bottom). The efficiency of the heat exchanger has been improved by adopting an optimum refrigerant path control where the refrigerant is distributed more into the top heat exchanger as this is where there is a greater air flow intake.

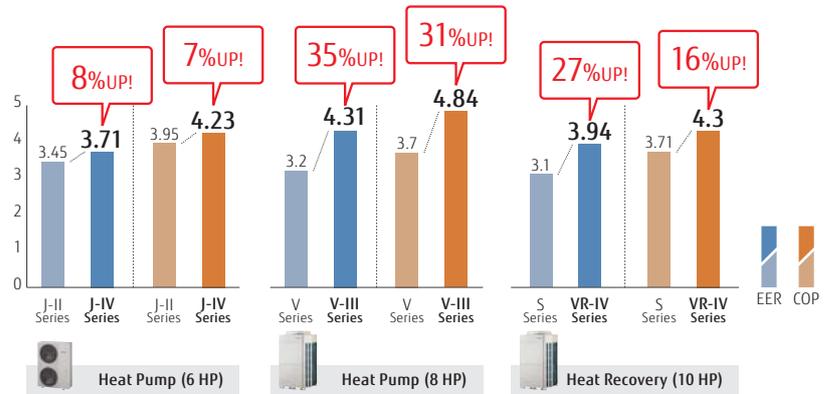

High Efficiency

Efficiency is improved significantly by using DC twin rotary compressor, inverter technology, and large heat exchanger

DC twin rotary compressor

ALL DC High efficiency design with top class SEER/SCOP

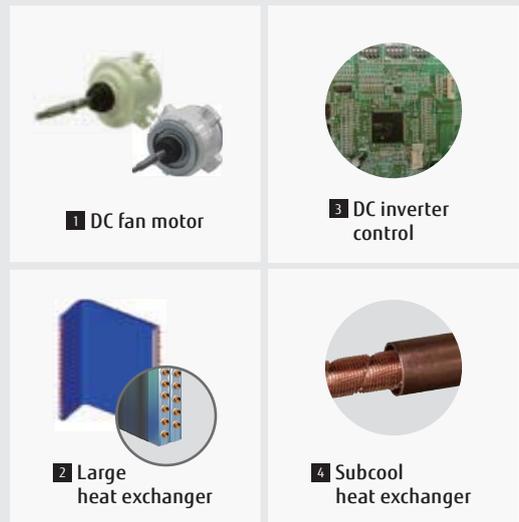

All VRF Series including J-IVL Series have DC technology to realise the high efficiency operation. This enhances the durability and reliability of VRF Series.

J-IVL Series

J-IV Series

J-IVS Series

V Series

Design Flexibility

Top class Compact design

Compact outdoor units are at the top of the class in the industry with an optimal compact design. (Up to 18 HP)

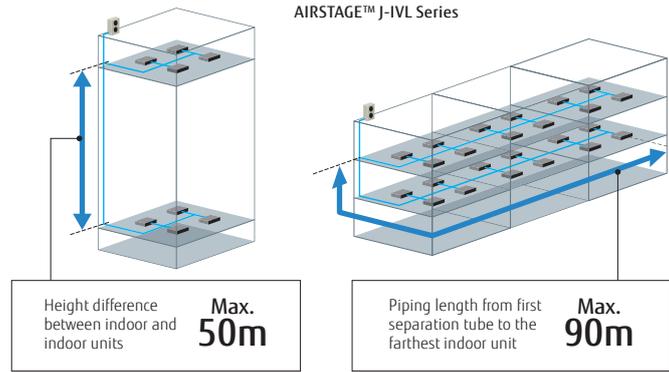

Long piping design

Piping design suitable for long, narrow office buildings with a large elevation difference are also possible.

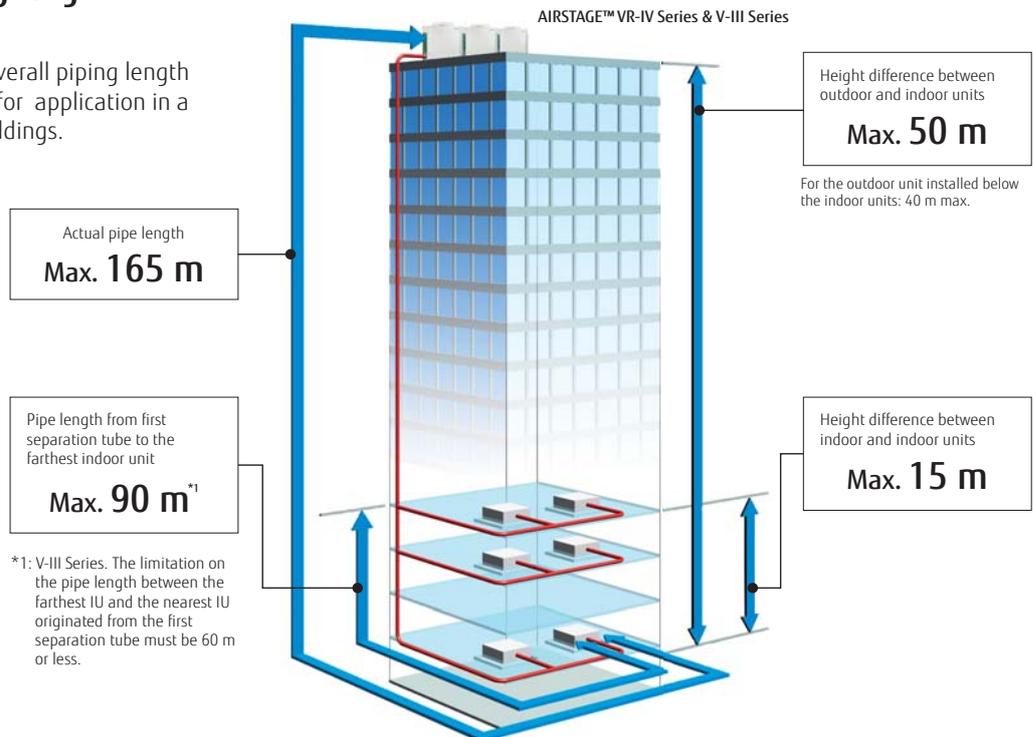

(AIRSTAGE™ J-IVL Series)

Overall piping length Max. 1,000 m

World's top class overall piping length of 1,000 m allows for application in a wide variety of buildings.

High capacity connection

Series	Connectable indoor unit capacity range	Connectable indoor unit number
AIRSTAGE™ J-IVL Series 14/16/18 HP Heat Pump type	50% to 150%* ²	up to 42* ⁴
AIRSTAGE™ J-IVL Series 8/10/12 HP Heat Pump type	50% to 150%* ²	up to 30* ⁵
AIRSTAGE™ J-IV Series Heat Pump type	50% to 150%* ²	up to 14* ⁶
AIRSTAGE™ J-IVS Series Heat Pump type	50% to 130%* ²	up to 13
AIRSTAGE™ VR-IV Series Heat Recovery Modular type	25%* ⁷ to 150%* ²	up to 64
AIRSTAGE™ V-III Series Heat Pump Modular type	50% to 150%* ³	up to 64

*2: Conditions of maximum connectable indoor unit capacity ratio is as the chart.

*3: Max. capacities in the combinations including the 18 HP outdoor unit fall below 150%.

*4: J-IVL Series 18 HP model only.

*5: J-IVL Series 12 HP model only.

*6: J-IV Series 6 HP model only.

*7: For modular type, 25% to 49.9% operation in the entire system is available. (by one unit operation)

Designed for low refrigerant charge

Optimal design of indoor unit and outdoor unit reduces the refrigerant volume and special detection is not required even when installing in a small room of about 15 m².

Various optional parts

- Intake fresh air with our Fresh Air Intake kit
- Comfortable temperature control with a remote sensor
- Operation by linking up to ventilation equipment and air handling unit with the DX-Kit

Fresh Air Intake kit

EEV unit

Control unit

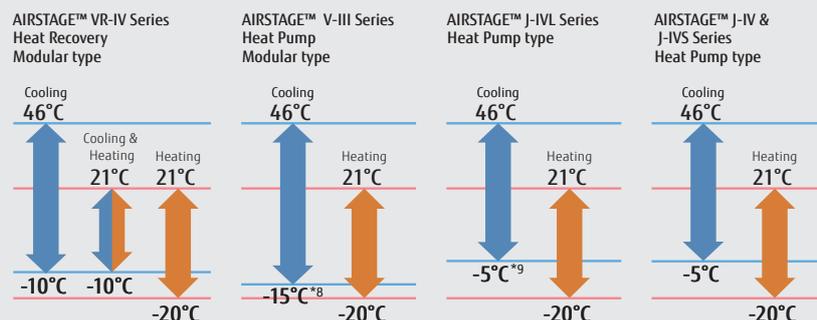

Low ambient operation

Refrigeration cycle technology allows cooling operation even at -15°C.

Wide operating range

Installation in extreme temperature conditions is possible due to an increase in operational range.

*8: Note: When a multiple outdoor unit connection is used, operating range is from -5°C to 46°C in cooling.

*9: Only when all indoor units are 5.6 kW or more in the system, the operation range is -15°C to 46°C.

Easy Installation

Easily transported

Easily craned using lifting belt hooks
Design of outdoor unit allows for lifting straps to be used

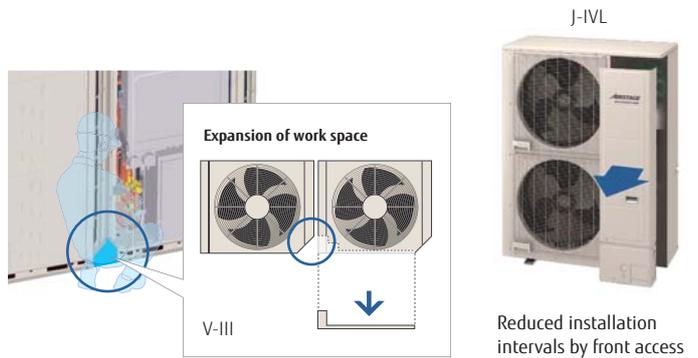

Transporting by forklift
Transport with forklift is possible.

Can be transported in a small elevator

Easy access

By adopting a L-Shape front panel that can be removed, the workspace for installation and service has been significantly expanded by this new design. For multiple installations, work is performed easily and efficiently even in a narrow space.

Flexible piping connection

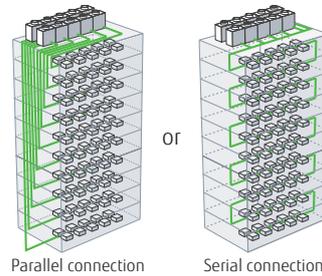

Piping and wiring are available to the front, left and right, and bottom.

Simple wiring work

Installation of the wiring systems is made easier as the communication wiring can be installed in parallel or in series between the indoor, outdoor and RB units.

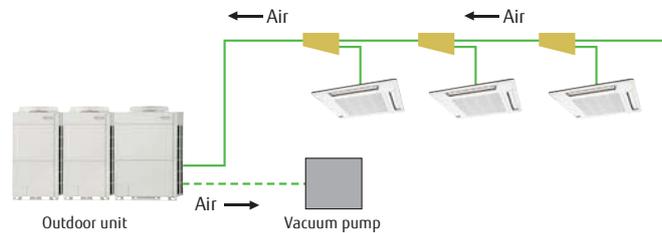

Up to maximum length
3,600 m

Note: Serial connection can't use the automatic address setting in a multiple refrigerant system.

Easy evacuation - using vacuum mode function

The vacuum mode function enables all expansion valves of indoor units to be fully opened, making it easy to evacuate all the air inside pipe lines and indoor units.

Automatic address setting

The address of the indoor unit, RB unit and signal amplifier through the automatic function setting on the outdoor unit PCB.

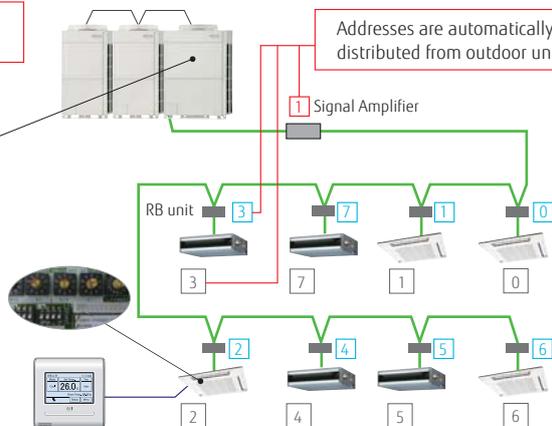

Automatic address setting is performed at outdoor unit

Addresses are automatically distributed from outdoor unit.

Press the push button of outdoor unit.

Manual address setting from indoor unit and remote controller is also possible.

Easy commissioning by Service Tool

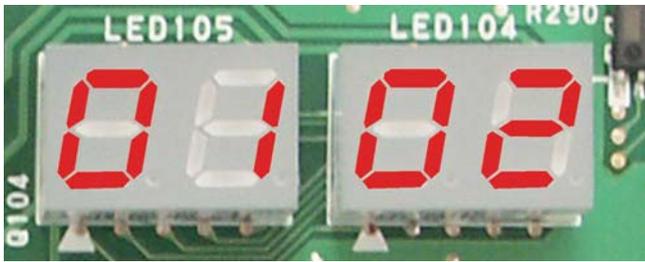

Service tools can be used to check the refrigerant temperature, pressure, and the operating status of the electronic expansion valve, making it easy to determine whether the units are connected properly.

Easy Service & Maintenance

Design for Easy Maintenance

7 segment LED is used to make it easy to check the details about the function setting status, refrigerant temperature, pressure, compressor operation time, and other factors for each model to make it easy to perform self-diagnostics.

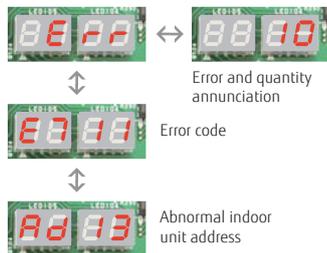

Easy to read 7-segment LED :

Confirm detailed operational and error status without using any specific equipment.

Error status can be checked easily by outdoor unit display

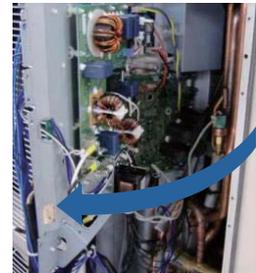

- Operation mode status
- Discharge temperature/Pressure status
- Compressor operation indication
- Address/type/number of outdoor unit

- Error status can be checked easily by outdoor unit display

Movable PCB panel

Easier for maintenance work behind the PCB

Error status can be checked easily via the indoor unit wired controller

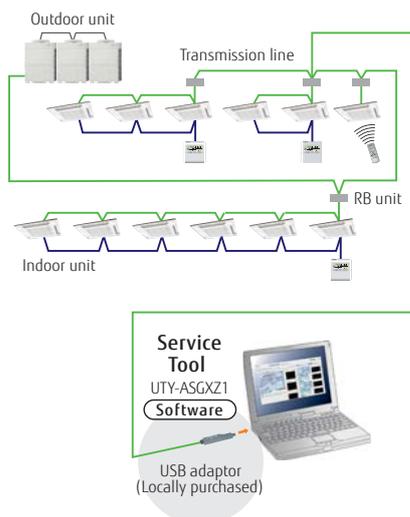

An error code is displayed on a liquid crystal screen.

Simple Remote Controller	Wired Remote Controller (Touch panel)

Error diagnosis by Service Tool

Connection to Service Tool

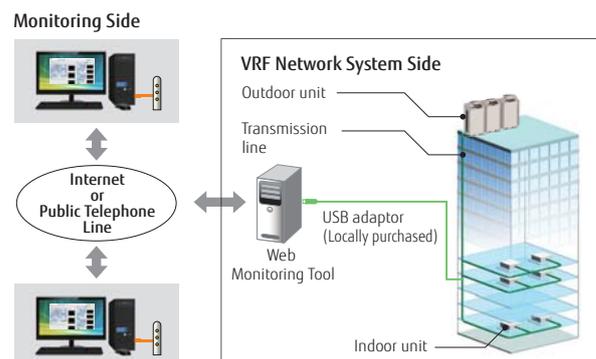

- Detailed operation status and recent error history can be checked and analysed by using the Service Tool.
- Last 5 min. operation memory can also be recorded.

Remote monitoring

The Web Monitoring system allows you to view system operation anytime over the internet, ensuring issue free operation.

The operating VRF network system in the building can be monitored real time over the Internet.

AIRSTAGE™ J Series Overview

Fujitsu General provides air conditioning systems for a wide range of applications from small office buildings and hotels to large stores, houses.

NEW Max. 18 HP Heat Pump
AIRSTAGE™ J-IVL

J-IVL is an outdoor unit with a slim design offering a high degree of freedom of installation that is recommended for mid-size office buildings and hotels. Furthermore, you can connect up to 42* indoor units with the newly added 14/16/18 HP models. 14/16/18 HP models are also ideal for hospitals and educational facilities with many rooms.

*: 18 HP model

Slim Outdoor Unit

Although this is a 14/16/18 HP model that can handle slightly larger requirements, it has a slim depth of 480 mm. This model can be installed even in limited spaces.

Small room application

Up to 30-42 indoor units can be connected by the optimum heat exchanger structure. Available to various small rooms.

Top Class Low Operating Sound

Low operating sound levels are achieved making the unit suitable for densely populated areas.

8-12 HP models

14/16/18 HP models

NEW Max. 6 HP Heat Pump
AIRSTAGE™ J-IV

J-IV allows the system to connect up to 13 indoor units. This model is suitable for small buildings and residential applications.

High Energy Efficiency

Heat pump inverter control is used to achieve an efficient cooling and heating operation with any indoor unit combination.

Flexible systems for small- and medium-size buildings air conditioning

Space saving design and long piping design allow flexible installations on the roofs or balconies of small and medium-size buildings. Multiple indoor units of various capacities and types can be connected.

NEW Max. 6 HP Heat Pump, Compact Design
AIRSTAGE™ J-IVS

J-IVS has a compact design with a height of 998 mm that does not obstruct visibility even when installed near waist-high windows. This model is also ideal for large houses, retail stores and other properties.

Space saving and low sound level design

Economical individual air conditioning is realised by ALL-DC technology, large capacity DC twin rotary compressor, and the compact 3-row heat exchanger.

Flexible systems for homes, shops, small-size buildings air conditioning

Due to compact size design and flexible piping design, the J-IVS Series can be installed easily at the place where the installation space is limited such as homes, shops, and small offices. Multiple indoor units of various capacities and types can be connected.

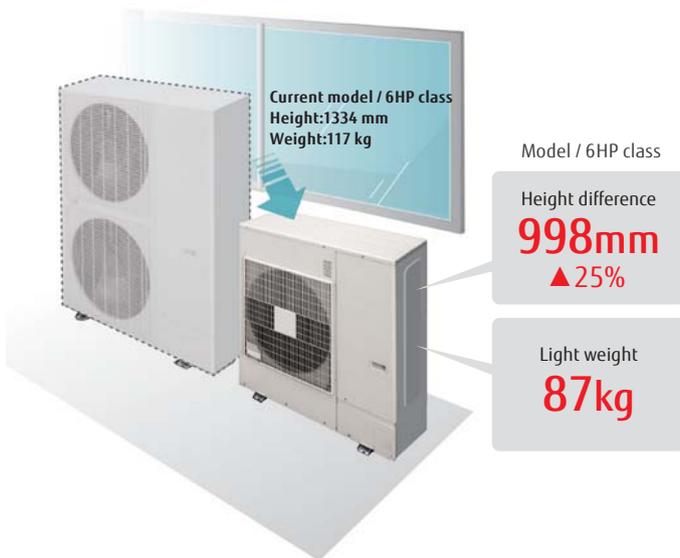

Heat Pump

for Small Capacity Type

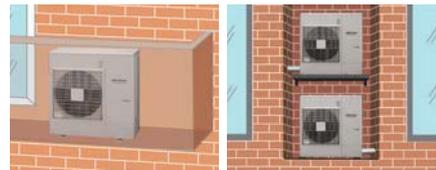

AIRSTAGE™ J-IVS

It Can be Easily Positioned and Installed

Small and light weight outdoor unit

This model is much more compact than conventional 6HP comparable outdoor units. Even when installed on the balcony it fits within the height of the fence. The compact size with a height of less than 1 m allows it to be installed under windows and in tight spaces

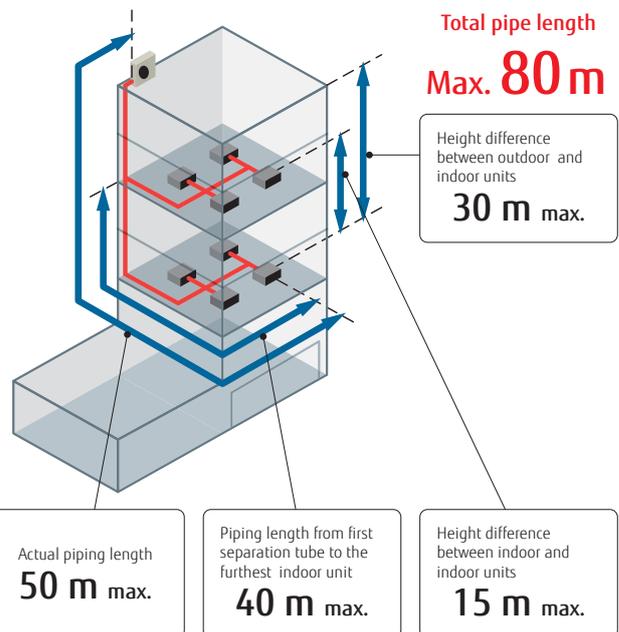

Low sound level design

Significantly low sound level is realised by using DC twin rotary compressor, inverter technology, and advanced airflow structure design.

Long piping length

Our advanced refrigerant control technology allows us to achieve a total refrigerant piping length of 80 m. This opens up possibilities in system design.

Up to 13 units* can be connected

Improvements in the design of the outdoor heat exchanger combined with our new 1.1kW indoor units mean that up to 13 indoor units can be connected.

*: 6 HP model

Model	Current model (J-IIS)			New model (J-IVS)		
	4	5	6	4	5	6

Max. Connectable indoor unit	1-7	1-8	1-8	1-11	1-12	1-13

Heat Pump for Small Capacity Type

AIRSTAGE™ J-III

Long Piping Length

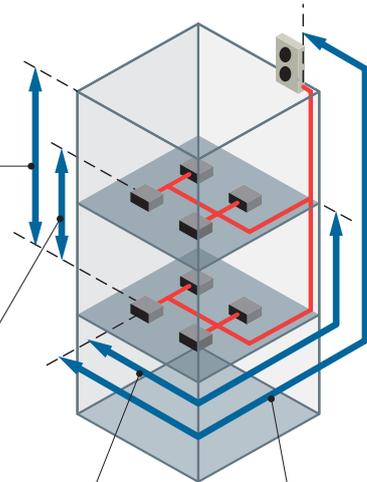

Our advanced refrigerant control technology allows us to achieve a total refrigerant piping length of 180 m. This opens up new possibilities in system design.

Total pipe length
Max. 180 m

Height difference
between outdoor and
indoor units
50 m max.

For the outdoor unit
installed below the
indoor units: 40 m max.

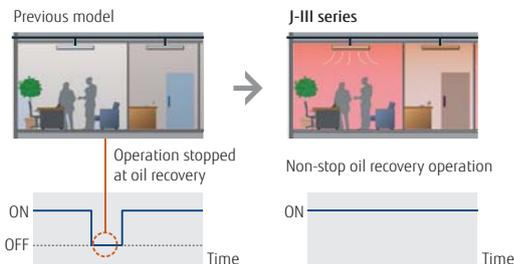

Height difference
between indoor and
indoor units
15 m max.

Piping length from first
separation tube to the
furthest indoor unit
40 m max.

Actual piping length
120 m max.

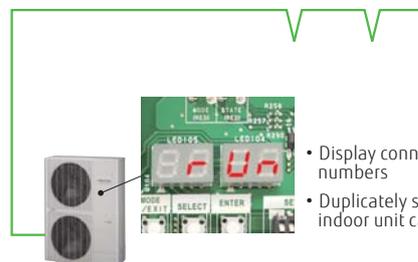

Non-stop oil recovery operation

A comfortable room condition is maintained during oil recovery mode because the product continues to operate without stopping the cooling or heating operation.

Easier Installation

Connection check function : Possible to confirm whether wiring connection and address setting are correct by a quick check run function.

- Display connected indoor unit numbers
- Duplicately set address number of indoor unit can be displayed

Heat Pump

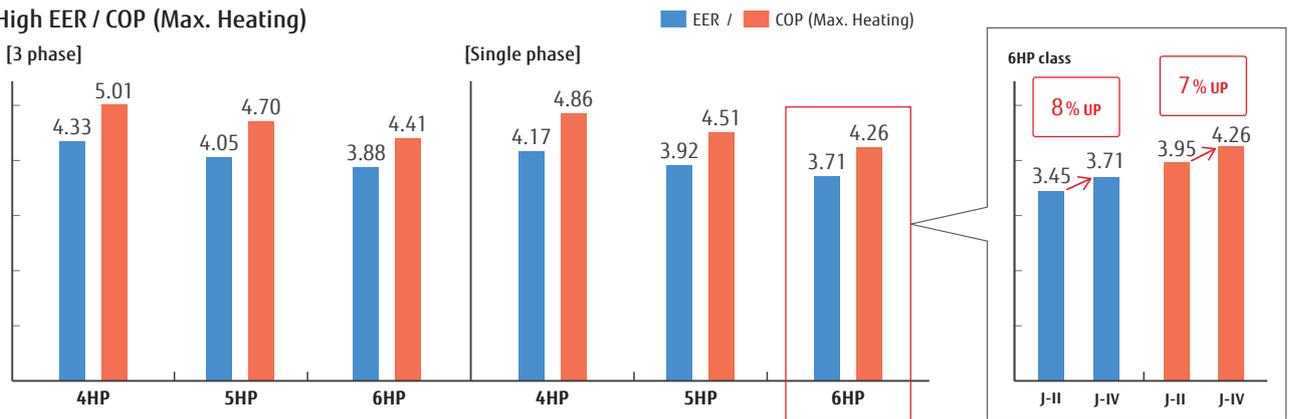

for Small Capacity Type

AIRSTAGE™ J-IV

Efficiency in actual operation

Top class high COP (Max. Heating) is achieved for all models because of a large heat exchanger, highly efficient DC twin compressor.

High EER / COP (Max. Heating)

Long piping length

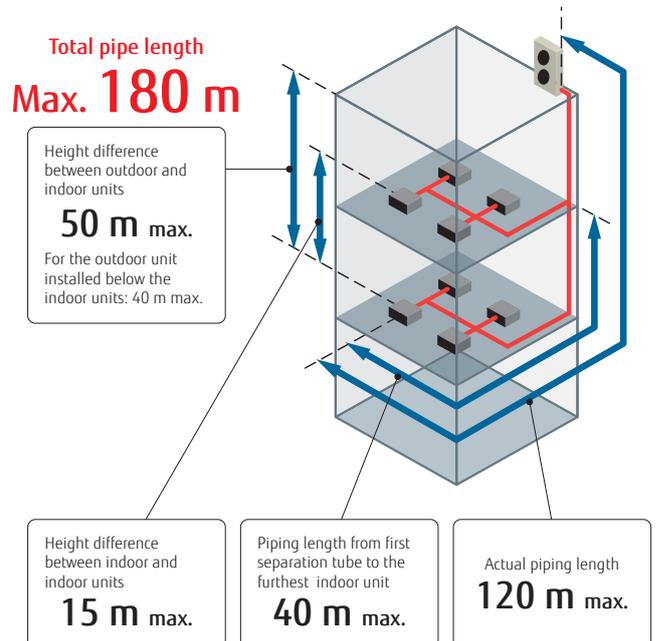

Our advanced refrigerant control technology allows us to achieve a total refrigerant piping length of 180 m. This opens up new possibilities in system design.

Up to 14 units* can be connected

Improvements in the design of the outdoor heat exchanger combined with our new 1.1kW indoor units mean that up to 14 indoor units can be connected.

AIRSTAGE™ V Series Overview

AIRSTAGE™ V Series Systems can be designed to effectively provide an air conditioning solution from a large domestic residence through to a large scale commercial building.

NEW Max. **48 HP** Heat Recovery
AIRSTAGE™ VR-IV

Smart and cutting-edge design.
 Extensive lineup from 8 HP to 48 HP in 2 HP increment.
 Connectable indoor unit capacity ratio up to 150%

Simultaneous cooling and heating operation using 1 refrigerant system

Cooling and heating can be freely selected for each indoor unit to provide simultaneous cooling and heating in rooms with different temperature requirements.

Annual cooling operation

Use annual cooling operation for the rooms and other spaces that require constant temperature control throughout the year.

Handles changes in the temperature difference

The operation mode can be freely changed when there are large temperature differences during the day, such as between seasons.

Max. **54 HP** Heat Pump
AIRSTAGE™ V-III

Smart and cutting-edge design.
 Extensive lineup from 8 HP to 54 HP in 2 HP increment.
 Connectable indoor unit capacity ratio up to 150%

Excellent energy saving

Heat pump inverter type achieves high energy savings for individual cooling and heating operation by all inverter technology for seasonal efficiency.

High design flexibility for various building air conditioning

High design flexibly meets the various needs of high-rise building air conditioning such as outdoor unit roof top concentrated installation and each floor installation by large capacity combination, sufficient connection capacity, and high static pressure design.

Easy installation and maintenance

The flexible communication method and piping connections make installation and maintenance easy even for large systems.

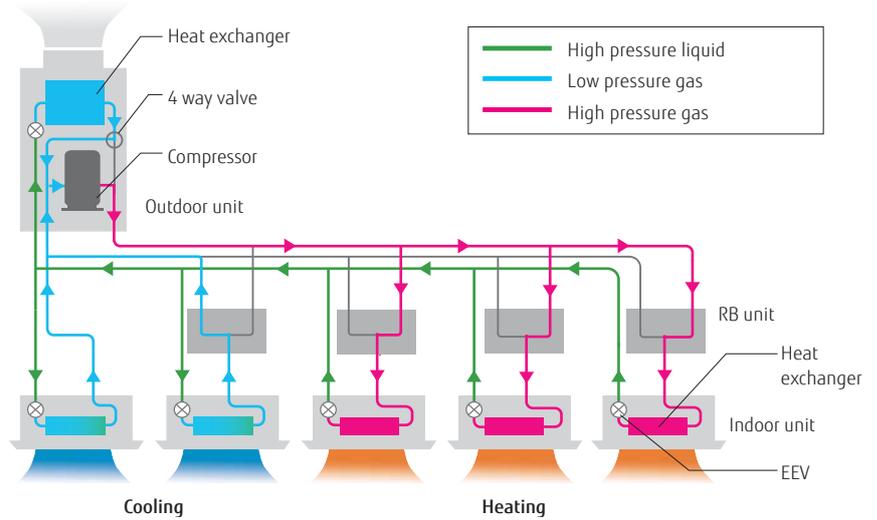

Heat Recovery Modular Type

AIRSTAGE VR-II

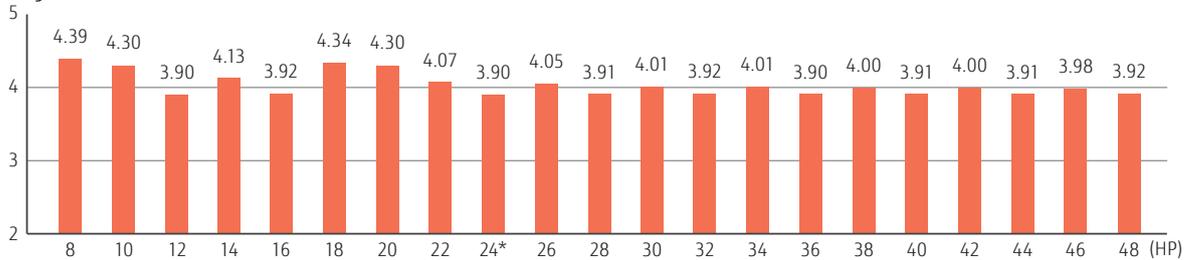

High Operating Energy Efficiency

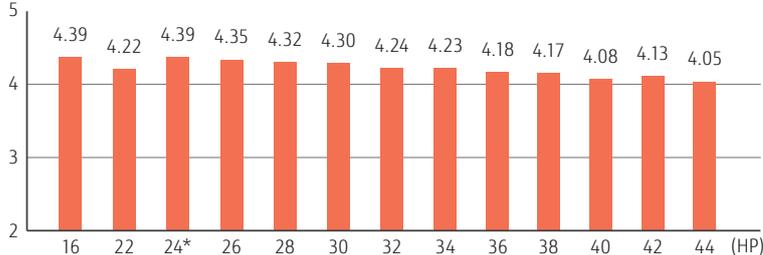

Our Heat recovery systems achieve high operating energy efficiency by drawing heat from the room to be cooled and transferring it as energy for rooms that are to be heated.

Space saving combination (COP)

Energy efficiency combination (COP)

For 24HP Combination

COP 12.6% UP

Note: Specifications are based on the following conditions.

Cooling: Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB.

Heating: Indoor temperature of 20°CDB / (15°CWB), and outdoor temperature of 7°CDB / 6°CWB.

Pipe length: 7.5 m; Height difference between outdoor unit and indoor unit : 0 m.

When cooling operation will be conducted at outdoor air temperature below -5°C,

the outdoor unit must be installed in a position that is higher than or equal to those of indoor units.

*1: Minimum connectable indoor unit number is 2.

*2: The noise value is the value when measured in an anechoic room. When measured in the actual installed state, surrounding noise and reflections are received and the measured value is usually larger than the indicated value.

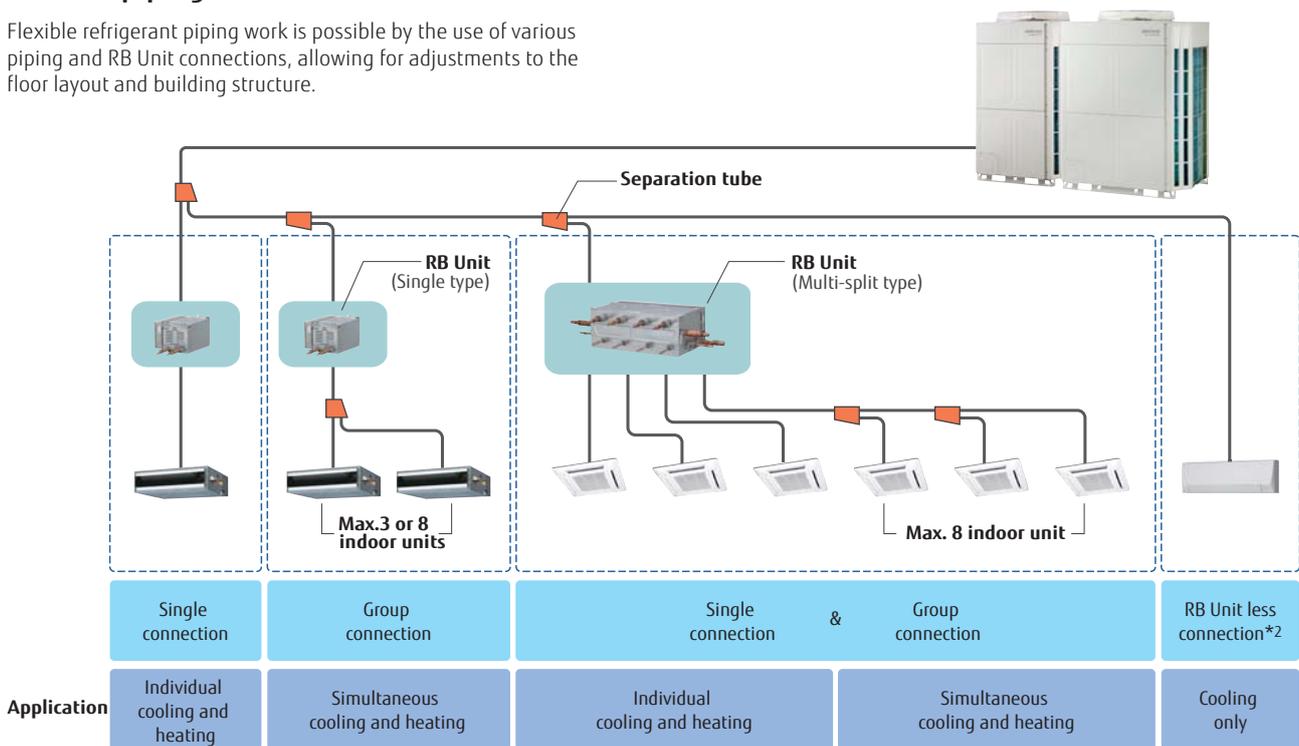

Heat Recovery

Modular Type

AIRSTAGE™ VR-IV

Flexible piping connection

Flexible refrigerant piping work is possible by the use of various piping and RB Unit connections, allowing for adjustments to the floor layout and building structure.

• The RB unit can be freely positioned between the first branch and the indoor unit.
 • The maximum height difference between RB units is 15 m.
 *2. RB Unit is not necessary for cooling only use.

Note: Specifications are based on the following conditions.

Cooling: Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB.
 Heating: Indoor temperature of 20°CDB / (15°CWB), and outdoor temperature of 7°CDB / 6°CWB.

Pipe length: 7.5 m; Height difference between outdoor unit and indoor unit : 0 m.

When cooling operation will be conducted at outdoor air temperature below -5°C, the outdoor unit must be installed in a position that is higher than or equal to those of indoor units.

*1: Minimum connectable indoor unit number is 2.

*2: The noise value is the value when measured in an anechoic room. When measured in the actual installed state, surrounding noise and reflections are received and the measured value is usually larger than the indicated value.

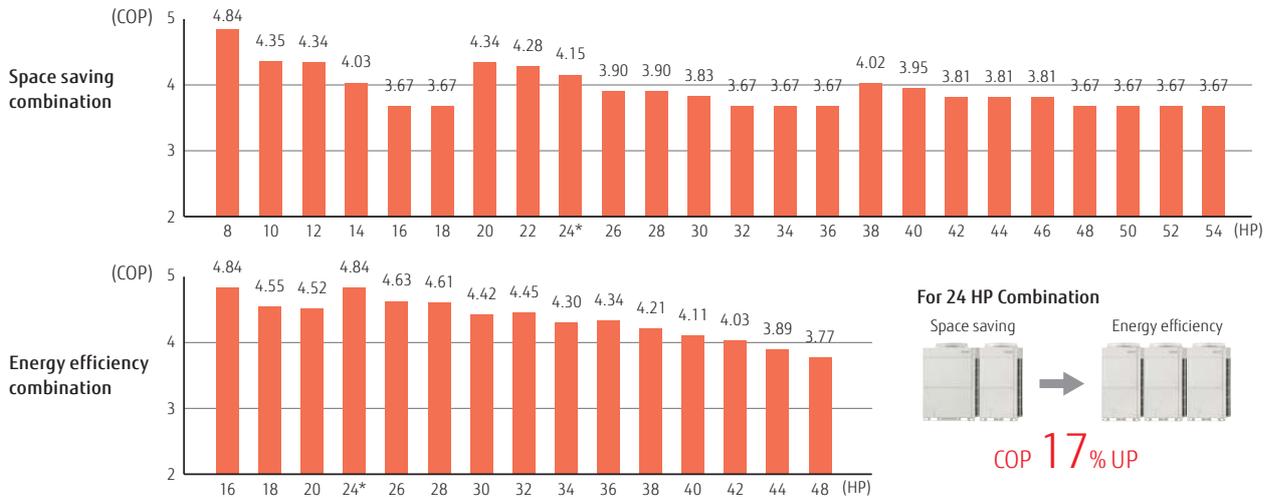

*3: When the connectable indoor unit capacity range is 25% to 49.9%, do not open the three-way valve except for the operating one unit. In addition, do not connect the power line.

Heat Pump Modular Type

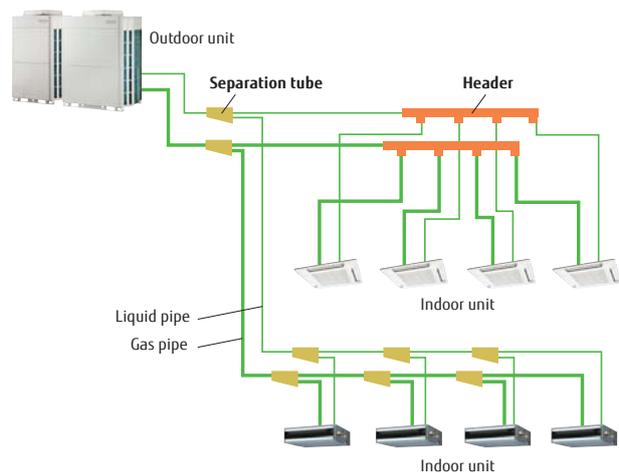

Efficiency in actual operation

Top class high COP is achieved for all combinations by our unique heat exchanger structure, highly efficient DC twin compressor.

System configuration example

- This system is used for medium-sized and large buildings. Connecting each outdoor unit makes it possible to create a high capacity system.
- Connection of multiple indoor units using separation tubes and headers.

Note : Specifications are based on the following conditions.

Cooling : Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB.
 Heating : Indoor temperature of 20°CDB / (15°CWB), and outdoor temperature of 7°CDB / 6°CWB.

Pipe length : 7.5 m; Height difference between outdoor unit and indoor unit : 0 m.

When cooling operation will be conducted at outdoor air temperature below -5°C, the outdoor unit must be installed in a position that is higher than or equal to those of indoor units.

*1 Minimum connectable indoor unit number is 2.

However, ARXC72 and ARXC90 can be used single connection.

*2 The noise value is the value when measured in an anechoic room.

When measured in the actual installed state, surrounding noise and reflections are received and the measured value is usually larger than the indicated value.

	Gas (Flare)		3/8			1/2	5/8	

Note : Specifications are based on the following conditions.

Cooling : Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB.

Heating : Indoor temperature of 20°CDB / (15°CWB), and outdoor temperature of 7°CDB / 6°CWB.

Pipe length : 7.5 m; Height difference between outdoor unit and indoor unit : 0 m. Voltage : 230 [V].

*1: This value is under cooling operation.

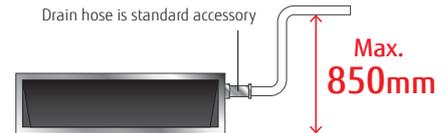

*:ARXD04GALH cannot be connected to J-IVS / J-IV / J-IVL Series.

Optional parts

Remote Sensor Unit : UTY-XSZX
 IR Receiver Unit : UTB-YWC (004)
 External Power Supply Unit : UTZ-GXXA

Auto Louvre Grille Kit: UTD-GXSA-W (04/007/009/012/014)
 UTD-GXSB-W (018)
 UTD-GXSC-W (024)

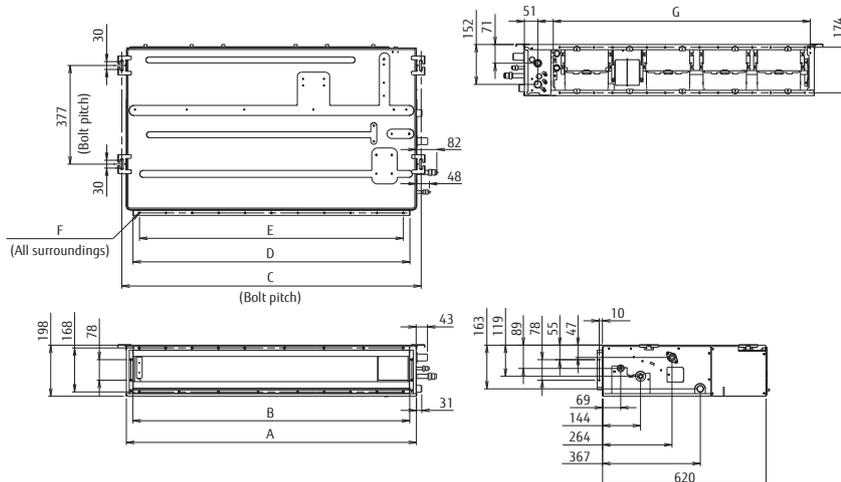

Wireless interface for use with Smart home products: FJ-AC-WIFI-1

VRF

Linwood now offer an extensive range of plenum boxes to suit the Fujitsu General Air Conditioning UK range of ducted air conditioning indoor units

Installing air conditioning ducted fan coil units (FCU's) just got easier with these purpose made plenum boxes designed to save you time and money when fitting VRF or split air conditioning systems

Easy to use online ordering & live order processing via

www.airconplenums.com/fujitsu-plenum

filter not supplied with plenum

Control System Overview

For VRF

User's needs are supported by offering a variety of controls, such as individual control, central control and building management control options.

Air Conditioning Individual Control

Wired Remote Controller (Touch panel)
